

Urology System

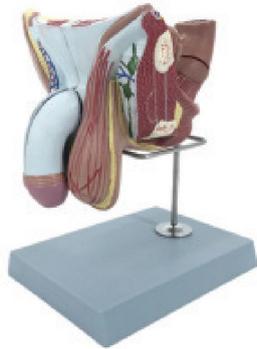

Male Urinary Bladder with Prostate

This 3X enlarged model displays the male urinary bladder and the prostate gland surrounding the urethra. Medially dissected, it clearly shows the internal and external structures, including the ureteric and urethral orifices, ductus deferens, seminal gland and ejaculatory duct. It is an ideal professional tool for urological anatomy teaching and demonstration.

Uterus Model

This life-size, 2-part healthy uterus model boasts highly detailed anatomy with meticulous hand-painting. The cervix, endocervical canal and uterine cavity are sectioned to clearly display the endometrium and myometrium. One fallopian tube and ovary are dissected to visualize follicles, making it perfect for professional IUD demonstration and anatomical teaching.

Male Genital Organs

This medially sectioned model dissects into 4 parts, clearly displaying the penis, prostate, bladder, seminal vesicle, spermatic cord, inguinal canal and testicle.

Uterus and Ovary Anatomy Model With Pathologies

This Uterus and Ovary Model with Pathologies displays both normal anatomical structure and various common pathological features. It clearly shows endometriosis, adhesions, carcinomas, polyps, cysts, pedunculated fibroids, salpingitis and fibroids. This model is an ideal professional tool for patient health education and medical anatomy teaching & research.

Female Genital Organs

This model can be dissected into 4 parts, and its internal organs are detachable from the pelvic floor, making it an ideal tool for anatomical teaching and demonstration.
