

Spirit burner

The base of the burner is a brass spirit container, on the top of which is a burner tube. Round the lower end of the burning, the heat makes the spirit in tube vaporized, and the alcoholic pour provides fame temperature up to 1000°C. By the side of the burner tube is and air adjuster, which controls fame tem-peratures. Used for experiments that need higher temperatures

Alcohol burner

Made Of Stainless Steel 100ml

Magnetic heat puddler

Specification:

1. power supply: 22V±10% 50HZ
 2. electro-motion power: 25W
 3. heater power: 150W
 4. speed: 0~2000 rotate/pcs
- Size (cm):24*17*13

Specification:

1. power supply: 22V±10% 50HZ
2. electro-motion power: 25W
3. heater power: 150W
4. speed: 0~2000 rotate/pcs

Insulation funnel

Flask electric heater

This product adopts high temperature resistant non-alkaline glass fiber as insulation material.

NO.1	100ml	100W
