Blood Pressure Measurement

Stage Pressure Sore Function

nasogastric

Senior full-featured geriatric Manikin(male/female)

Product features

The product is upgraded in the function to increase the arm blood pressure measurement operation training function, set the strengths of equivalent foreign products, developed by the company's development of advanced nursing basics covered by all the nursing operation function of the simulator model. The model has overall care and disassembly of sub-parts for skills training and teaching. The model is made of imported plastic materials, stainless steel mold casting process. Has a realistic image, the operation of real, easy to disassemble, structural standards, durable and so on. Is currently the more advanced, fully functional, materials to examine the new products.

Functional features:

- Arm blood pressure measurement operation training
- Cleaning and combing hair, wash your face
- Eye and ear cleaning drops
- Oral care, denture care
- Oral and nasal tracheal intubation
- Tracheotomy care
- Sputum aspiration
- Oxygen inhalation
- Oral and nasal feeding
- Gastric lavage
- Chest drainage
- Abdominal drainage
- Arm vein puncture, injection, transfusion (blood)
- Subcutaneous injection in the deltoid muscle
- Lateral femoral muscle injections
- Thoracic, abdominal, hepatic, bone marrow, lumbar puncture
- Breast care, mammograms
- Enema
- Female catheterization
- Male catheterization
- Female bladder irrigation
- Bladder irrigation for men
- Fistula drainage
- Colostomy
- Buttock intramuscular injections
- Holistic care: scrubbing, dressing, hot and cold therapy
- Left-right bending, rotation, and up-and-down movement of extremity joints
- Trauma assessment and care: sterilization, cleaning, dressing, hemostasis, bandaging

Product Packaging: 136cm*48cm*25cm 20kgs

Combined Multifunctional Nursing Practice Manikin(male/female)

Product features

① The model is suitable for health,nursing schools and medical schools at all levels for nursing demonstration and teaching purposes. The model is made of soft and semi-rigid plastic,which is firm,durable and lightweight.

②All joints of the model can move and rotate,and the waist can also be bent and all parts can be loaded and unloaded.

③ The model has 24 types of basic nursing operation demonstration.

④ Made of PVC material

⑤ Main Functions:

1.Face wash and bed scrub

2.Oral care

3.Tracheotomy care

4.Oxygen inhalation therapy

5.Nasogastric feeding

6.Gastric lavage

7.Intracardiac injection

8.Chest resuscitation

9.Pneumothorax

10.Thoracentesis

11.Liver puncture

12.Abdominal Puncture

13.Bone marrow aspiration

14.Lumbar puncture

15.Deltoid injection

16.Subcutaneous injection at the lower level of the deltoid muscle

17.Intravenous Injection

18.Venipuncture

19.Intravenous Fluid Transfusion

20.Intravenous Blood Transfusion

21.Male and female urinary catheterization

22.Male and female enema

23.Gluteal muscle injection

24.Breast care
