

Walker

Product application

1. Clinical Rehabilitation: For post-surgery recovery, stroke patients, and those with lower limb injuries to regain walking ability.
2. Elderly Care: Assists seniors with reduced mobility, balance issues, or muscle weakness to move safely at home or in care facilities.
3. Home & Community Care: Ideal for indoor/outdoor use, including hospitals, nursing homes, and home environments.
4. Specialized Use: Some models integrate commode/shower functions, serving as multi-purpose aids for toileting and bathing.

Product features

1. Light weight & Durable Frame: Made of high-strength aluminum alloy, lightweight for easy handling while ensuring sturdiness and long-term use. Single-use, EO sterilized, medical-grade materials, non-toxic, non-irritating
2. Height Adjustable: Different height adjustment to fit users of different heights, ensuring ergonomic comfort.
3. Foldable Design: Compact folding for convenient storage and transport, perfect for travel or limited-space environments.
4. Versatile Accessories: Compatible with optional accessories like commode seats, shower boards, trays, and wheels to meet diverse care needs.
