

30ml Disposable Plastic Measuring Cup

Product features

Precision Volume Markings: Clear, bold 5ml–30ml graduation lines (with 5ml increments) enable accurate liquid measurement.

Stackable Design: Tapered shape allows space-saving stacking of multiple cups, reducing storage footprint.

Disposable Hygiene: Single-use design eliminates cross-contamination risks, clean handling in clinical.

Lightweight: Flexible yet shatter-resistant construction resists cracking during use, making it safe for elderly users.

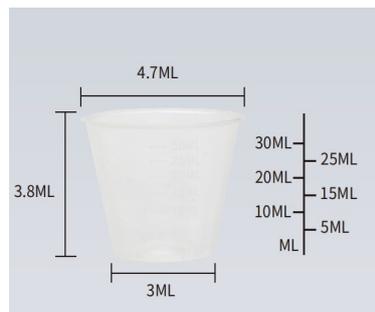

Easy Pouring: Wide rim and tapered spout enable controlled, spill-free pouring, ideal for precise liquid transfer.

Product Overview

Our 30ml disposable plastic measuring cup is a precision liquid measurement tool designed for medical, laboratory, and household use. Featuring clear volume graduations and a lightweight, stackable design, it provides accurate dosing and convenient storage for pharmaceuticals, reagents, and daily liquids.

Size & Specifications

Eco-Friendly	Disposable
Graduation Range	5ml - 30ml
Carton Size	36*26*25CM
Material	PP
Color	Clear
Capacity	30ml

Application Scenarios

Medical & healthcare: Oral medication dosing, elderly liquid administration, and clinical sample collection.

Laboratory & research: Reagent measurement, sample dilution, and small-scale liquid handling in diagnostic settings.

Food & beverage: Precise measurement of flavorings, extracts, and ingredients in cooking/baking.

Household & DIY: Dosing of cleaning solutions, plant nutrients, and craft materials.

Veterinary care: Safe liquid administration for pets and small animals.
