

Bedside Handrail

Product Features

Secure Grip: Crafted from durable materials with a non-slip outer coating, this rail provides a reliable handhold for seniors with limited strength or unsteady balance.

Easy Operation: The orange release button enables one-handed folding and locking, requiring minimal grip strength to stow the rail flat against the bed when not in use.

Versatile & Adaptable Fit: The adjustable mounting brackets fit most bed frames, while the sturdy base ensures stability even with repeated use.

Hygienic & Durable: The smooth surface is easy to wipe clean, resisting stains and odors for long-term use in home care or clinical settings.

Senior Home Care: Assists elderly users with safe bed mobility and reduces fall risks.

Product Overview

Our foldable bedside safety rail is a professional mobility aid designed to provide stable support for seniors, post-surgery patients, and individuals with limited mobility. It assists with safe bed entry/exit and prevents nighttime falls, while its foldable design ensures flexibility and space efficiency for daily use.
