

Drainage Bag System

Product features

- 1 **Supine Type (Unisex)** : For long-term bedridden patients with urinary incontinence, coma, or fracture paralysis who cannot urinate independently.
- 2 **Standing Type (Male-only)**: For ambulatory male patients with urinary incontinence caused by Alzheimer's disease, prostatic diseases, or diabetes.

Product features

- 1 Multiple material options: food-grade silicone, antibacterial biochar silicone, TPU, latex; third-party certified, non-toxic, non-allergenic, with >99.9% antibacterial rate for antibacterial
- 2 Anti-reflux soft edges + freely openable air holes, effectively prevent side leakage and skin damage from prolonged dampness.
- 3 Skin-friendly fixing pants: cotton + 3D breathable mesh / pure cotton fabric, high elasticity, easy to wear, remove and wash.
- 4 Equipped with high-quality catheter + thickened leak-proof urine storage bags; trimmable catheter for standing type, with concealed leg-side bags.
- 5 Core silicone material is acid/alkali/high temperature resistant, boilable for disinfection, anti-aging and durable.

Product features

- 1 Supine Type: Female-specific, male normal/atrophy type (selected by genital size, not age).
- 2 Standing Type: Removable/non-removable structures, multiple sizes available by waist
- 3 Full series OEM customization available.
