

Oral Dosing Applicator

Product features

Safe Materials: BPA-free plastic, this syringe is non-toxic and gentle on sensitive oral tissues.

Needle-Free Design: Safe for use by healthcare professionals, caregivers.

Airtight Sealing Cap: The included plastic screw cap creates a leak-proof seal, preventing contamination.

Smooth Plunger Action: The ergonomically designed plunger glides effortlessly, ensuring consistent, controlled dispensing without spills.

Reduced Choking Risk: The narrow, soft-tip nozzle allows slow, controlled dispensing directly into the side of the mouth, minimizing aspiration and choking risks.

Product Overview

Our oral dosing applicator is a special drug feeding tool, which is composed of a barrel, plunger and an adaptor. It can replace a measuring cup and a medicine spoon to accurately feed drugs to patients. It is mainly suitable for various oral liquid preparations.

Capacity

5ML and 10ML are available for selection.
