

Electric Suction Apparatus

Core Product Line

- 1 **High-Capacity Model:** Designed for high-volume suction requirements.
- 2 **Portable Model:** Compact and mobile, ideal for bedside and emergency use.
- 3 **Premium Model:** Featuring enhanced performance and a robust build for intensive settings.

Key Features

- 1 **Oil-Free Pump:** Ensures reliable, low-maintenance operation and eliminates the risk of oil contamination.
- 2 **Overflow Protection:** Prevents liquid backflow, safeguarding both the device and patient safety.
- 3 **Quiet Operation:** Maintains a noise level below 60dB(A) for a comfortable patient environment.
- 4 **Mobility Options:** Equipped with castors for easy maneuvering within clinical settings.
- 5 **Hygienic Design:** Optional disposable suction liners (2L) are available for enhanced infection control.

Technical Specifications

- 1 **Max Negative Pressure:** 90±10KPA
- 2 **Input Power:** 180VA
- 3 **Max Air Flow:** Up to 40L/min (without jar)
- 4 **Liquid Collection:** Dual jars, with capacities ranging from 2000mL to 2500mL per jar.
- 5 **Noise Level:** ≤60 dB(A)
