

Prescription Vials with Child-Resistant Caps

Product features

- Primary Material: Food-grade PET plastic (BPA-free, non-toxic).
- Light Protection: Amber (UV-protective to preserve medication efficacy).
- Child-Resistant Closure: Child resistant cap and easy open design.
- Eco-Friendly and Durability: 100% recyclable, reducing environmental impact.
- Various specifications: A comprehensive range of sizes to accommodate diverse medication quantities.

Product Overview

Our amber plastic prescription vials are engineered for safe, compliant medication storage in pharmacies, hospitals, and healthcare facilities. The amber-tinted design shields light-sensitive drugs from UV degradation, while the child-resistant closure ensures adherence to global safety regulations.

Customization Options
