

# Pressure Ulcer Prevention Air Mattress

## Product features

1. Provides effective pressure redistribution to reduce bed sore risk
2. Low air loss design maintains consistent comfort and support
3. Quiet air pump system for undisturbed sleep
4. Water-proof and moisture-proof skin-friendly surface
5. Easy to clean, durable and long-lasting material
6. Suitable for long-term bedridden patients
7. Adjustable pressure settings for personalized care

## Specifications

1. Product specifications: 2000×900mm
2. Multi-Function Care: Supports independent or simultaneous backrest adjustment, leg elevation, and side repositioning. Timed auto-repositioning reduces caregiver workload.
3. Safety Alerts: Audible alarms for low air pressure or unexpected power failures to ensure patient safety.
4. Adaptive Intelligence: Auto-adjusts inflation based on patient weight; customizable alternating times for personalized comfort and pressure relief.
5. Remote Control: Enables convenient, hands-free operation from a distance.
6. Hygienic Design: Model D includes an integrated bedpan opening for enhanced toileting convenience and infection control.
